Key Points:
- Incredible top-end yield with good test weight
- The best head scab resistance in the industry
- Great behind corn
- Clean plant from diseases, start to finish
- Shorter plant & stands well
- Responds to higher populations

AgriMAXX 463 has been a standout variety with a large fan base. It’s been a no-brainer for many growers as it is the #1 rated variety for head scab, big time yields, excellent standability, low straw for double croppers, monster head size and it’s early! 463 is best positioned on average to better soil and planted at thicker populations. 463 is an offensive and defensive combination variety...its yield response to fungicide is low but also has the ability to win plots and yield 130+ in a good year.

- **CHARACTERISTICS**
  - Double Crop Suitability: 10
  - Winter Hardiness: 8
  - Straw Yield: 4
  - Test Weight: 7
  - Lodging: 10
  - Yield Potential: 10

- **DISEASE RATINGS**
  - Head Scab: 10
  - Leaf Rust: 8
  - Stripe Rust: 9
  - Sep. Leaf Blotch: 8
  - Sep. Glume Blotch: 8
  - Powdery Mildew: 7
