

Soft Red Winter • MEDIUM

# AgriMAXX 514

high performance wheat

**NEW**

Maturity	Medium
Head Type	Bearded
Height	Medium

- Top performer in Midwest & South
- Strong tillering ability
- Good for 15" rows
- Great choice for lighter soils & lower fertility environments
- Palisade recommended in high fertility
- Impressive all season
- A beauty at harvest

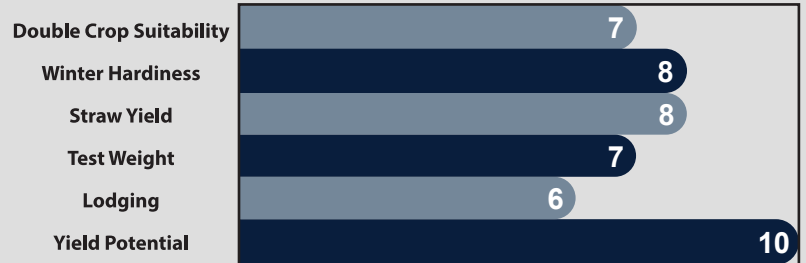

AgriMAXX 514 replaces the Midwest favorite 444 with more yield, better scab and an earlier harvest. We accelerated this variety as it ranked #1 in our MO/IL regional summaries and had plot winning yields moving south in the southern regions. 514 is an aggressive tillering variety that works best in lower organic matter soils, low fertility environments, late plantings and areas where growers need more heads per sq/yd. Good plant health and head scab scores make it a beauty.
