

Soft Red Winter • MEDIUM

AgriMAXX 454

high performance wheat

Maturity	Medium
Head Type	Bearded
Height	Medium

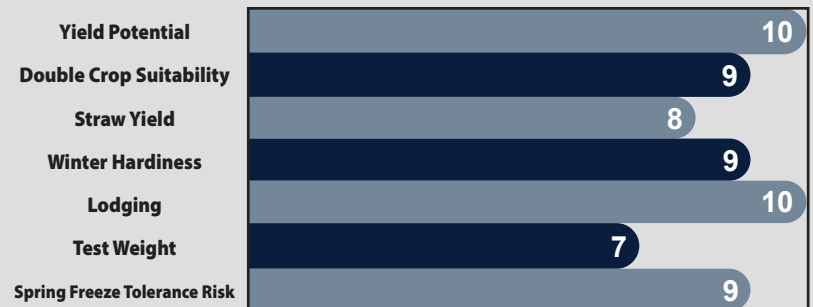

- Extreme top end yield potential
- Responds great to high management
- Excellent on all soils, handles wet feet well
- Fungicides highly recommended
- Good choice for 15" rows

AgriMAXX 454 is all about yield for high management growers. 454 has been a lead yielder for several years and handles nearly every soil type for dependability. We've seen 454 perform great when planted both early and late. This variety tillers well and gets its yield from high head counts and large tiller heads. We are impressed at the straw strength of 454 and it's a good variety for high nitrogen rates. The most important tip when raising 454: apply multiple fungicides... it will become a yield monster.
