

Soft Red Winter • MEDIUM

AM 454

high performance wheat

Maturity	Medium
Head Type	Bearded
Height	Medium

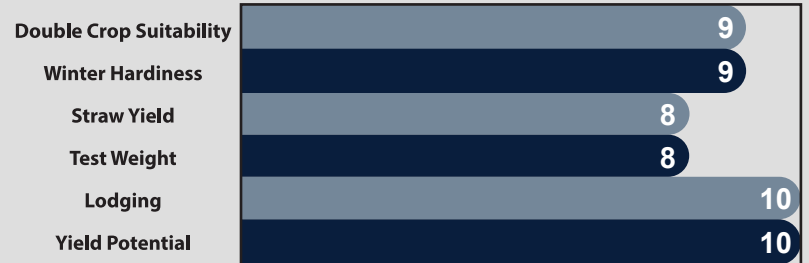

- Extreme top end yield potential
- Excellent head scab scores
- Very good test weight
- Responds great to high management
- Excellent on all soils
- Fungicides highly recommended

AM 454 is all about yield for high management growers. AM 454 has been a lead yielder for several years and handles nearly every soil type for dependability. We've seen AM 454 perform great when planted both early and late. This product tillers well and gets its yield from high head counts and large tiller heads. We are impressed at the straw strength of AM 454 and is a good product for high nitrogen rates. The most important tip when raising AM 454: apply multiple fungicides... it will become a yield monster.
