

Soft Red Winter • MEDIUM EARLY

AM 553

NEW

high performance wheat

Maturity	Medium Early
Head Type	Bearded
Height	Medium Short

- High yielding, stable performance across regions
- Medium short plant with lower straw production
- Performs well across all soils
- Lead yielder for Medium Early maturity class
- Protect with insecticide treatment if planting early

There's a lot to like about the new AM 553 as it's a great fit for double crop operations...good yields, shorter plant, good test weight and timely harvest. AM 553 was the top medium early yielder in our 2024 testing. AM 553 gets its yield in high tillering, high head count environments. It has a very good overall agronomic package and responds to management. We like the use of Palisade and fungicides in the management program for top yields. It matures nicely in the desired medium early group for timely double crop plantings, making it a great all-around performer.
