

Soft Red Winter • MEDIUM LATE

AM 498

high performance wheat

| | |
|------------------|-------------|
| Maturity | Medium Late |
| Head Type | Smooth |
| Height | Medium Tall |

- Strongest in northern zones
- Good choice for growers wanting straw
- Responds to fungicides at bloom
- Excellent milling & baking quality
- Palisade recommended in high fertility
- High nitrogen use efficiency

AM 498 replaced our popular AM 438. Visually, they look similar in the field, but AM 498 has better yield, standability, scab and test weight. AM 498 tillers well and has excellent winter hardiness for northern winters. It's a fuller season maturity that has a niche for growers wanting a longer season variety. If you are wanting straw, AM 498 is a good choice as it tillers well and is a taller variety. Our research has shown that AM 498 responds to fungicides at bloom for growers managing for top-end yields.
